Work Experience

CodSoft

October 2023 – November 2023

Java Developer Intern

- As a Java Developer Intern at Codsoft India Pvt. Ltd., I was immersed in a dynamic and collaborative environment that significantly enhanced my technical and professional skills. Throughout the internship, I quickly adapted to new tools and frameworks essential for our projects, including Spring Boot, Hibernate, and Maven. I gained hands-on experience with RESTful web services, MySQL databases, and version control systems like Git.

SmartInternz

May 2024 – July 2024

Salesforce Developer Intern

- As a Salesforce developer intern and working on various hands-on projects, I've gained proficiency in Apex programming, Visualforce, and Lightning components, enabling me to build robust and scalable solutions tailored to business needs.

Projects

Dream World Properties

- Dream World Properties is a online e-commerce application to handle the clients and their property related requirements. It is developed using SpringBoot.

Online Banking Portal

- Online Banking Portal is a fullstack project which allows the users to securely login and manage their accounts, fund transfer, bill payments, manage their cards, where customer can also get the transaction history.
- Technologies Used:** HTML, CSS, JavaScript, SpringBoot, REST API, JSON, MySQL

YumXpress

- YumXpress is an innovative food ordering desktop application designed to streamline the dining experience. It offers a user-friendly interface for browsing menus and placing orders. With integrated payment options and customizable meal choices, YumXpress ensures a seamless and personalized service for every user. The app also features ratings and reviews to help customers make informed decisions about their meals.
- Technologies Used:** Java SE, MySQL and NetBeans.
